CCHS
ARCHIVES

The CCHS consists of the Archives and the Clinton County Historical Museum. We have visitors that want to know what history is available about their business or place of residence. We show them what we have and then refer them to the Clinton County Court House to gather more information. Until the beginning of this project, the information has been scattered in different areas of our collection and we want that to change. This will be an ongoing project so please stop back.

Mailing routes are not divided by townships nor do they always stay within our county lines. The starting place will be with zip codes and the city/town/village related to that code.

We are starting with the 48879 zip code which is the St. Johns Post Office. We will be adding the other Clinton County zip codes as soon as possible.

City Directories and miscellaneous information sources are being used to create this project. We have a searchable database that you can search, by Name, Postal Number, or Street Name. (Street names do not have periods after E Cass St as an example.) In the 1940's the downtown St. Johns business addresses were converted to 3 digit numbers so you will have to look at, as an example, 12 or 112 N. Clinton Ave. for the Sugar Bowl. And as more houses were built the house numbers could have changed to accommodate the new additions on the block.

Spellings are pretty much what was in the source document and there isn't a guarantee of complete accuracy. Just a good try for it.

House photos are by zip code and then Street or Road. We are trying to include all we can find to show you the old, remodeled, and new.
